However, the above limitations shall not apply to any indemnification, confidentiality, or payment obligations set forth in the Agreement, a violation of Milliman's intellectual property rights, or actual damages incurred by a party hereto as a direct result of any criminal or fraudulent acts of the other party or its agents. The parties agree that the fees set forth in this Agreement reflect the limitation on warranties and liability, and the allocation of risk, under this Agreement.

Notwithstanding the above, Milliman shall have no liability for any claim which: (i) pertains to any Milliman Property that has been altered or modified without Milliman's prior written approval; (ii) is based on use of the Product in conjunction with any item not provided by Milliman, unless such use is shown to constitute the infringement when not used in conjunction with the item not provided by Milliman; or (iii) identifies any third-party software, hardware, or service as forming the basis of such infringement.
- 5.2. **By Customer.** Customer shall, at its expense, defend, indemnify, and hold harmless Milliman and its employees, agents, successors and assigns from and against any and all loss, damage, liability, and expense arising from any claim brought against any such indemnified party related to Customer's misuse of the Product.
- 5.3. **Procedures.** For any indemnifiable claim hereunder, an indemnified party shall provide the indemnifying party with prompt written notice of any such claim brought against it, together with copies of all related court documents involving such claim. An indemnified party's failure to provide timely notice to the indemnifying party of any such claim shall not relieve the indemnifying party from any liability hereunder, to the extent that the indemnifying party is not prejudiced by such failure. The indemnifying party shall have the sole right to conduct the defense of any such claim, and all negotiations for its settlement. The indemnified party shall provide the indemnifying party with such information and assistance for the defense of such claim

as is reasonably requested by the indemnifying party.

6. CONFIDENTIALITY

- 6.1. General.** Neither party shall use, or otherwise disclose to any third party, the other party's Confidential Information without the prior written consent of the disclosing party; provided, however, that Milliman may use and disclose Customer Confidential Information as necessary in order to provide access to the Product hereunder or any Services. Except as otherwise necessary to meet any legal or professional requirements for retention, upon the disclosing party's request, the receiving party will return or destroy all Confidential Information of the disclosing party that is in its possession.
- 6.2. ID Codes and Passwords.** Customer shall ensure the confidentiality of its corporate identification codes, user identification codes, and user passwords used in connection with the Product ("ID Codes"). Customer shall be responsible for all transactions entered through and under any ID Codes, and any such transactions will be deemed to be made by Customer. In no event will Milliman be liable for the foregoing obligations or the failure by Customer to fulfill such obligations.

In particular, without limiting the foregoing, Customer shall not refer to the Product as the basis or source for decisions related to the management of an individual patient. Neither party shall refer to the identity of the other party in any third party disclosures, including without limitation, promotional material or press releases relating to the Product, unless the prior written consent of the other party has been obtained, provided, however, that Milliman may use Customer's name and logo in promotional materials or press releases for the limited purpose of identifying Customer as a customer of the Product.

immediately upon delivery of written notice upon any nonpayment of sums due or material breach hereunder by any party (the “breaching party”), if the other party (“non-breaching party”) gives written notice of such breach to the breaching party and the same is not cured within thirty (30) days after delivery of such notice.

- 7.2. **Duties upon Termination.** Upon termination of this Agreement: (i) Customer shall immediately pay Milliman for all unpaid fees accrued hereunder through the effective date of termination; (ii) Milliman may invalidate the ID Codes and otherwise deny further access to the Product; and (iii) at Customer’s written request, Milliman will provide an electronic copy of Customer Data within 30 days of receiving such request, provided that Milliman may retain one copy of any Customer Data as necessary to comply with applicable work product documentation standards, and subject to the obligations of confidentiality contained herein. Termination of this Agreement shall not be construed to waive or release any claim that a party is entitled to assert at the time of such termination, and the applicable provisions of this Agreement shall continue to apply to such claim until it is resolved. The terms of Sections 1.4, 4.2, 4.3, 4.4, 5, 6, 7.2, and 8 of this Agreement shall survive the termination of this Agreement.

8. MISCELLANEOUS

- 8.1. **Notices.** Except as otherwise specified herein, all notices hereunder by either party shall be given by personal delivery (including reputable courier service), fees prepaid, or by sending such notice by United States certified mail return receipt requested, postage prepaid, and addressed as set forth on Exhibit A of this Agreement. Such notices shall be deemed to have been given and delivered upon receipt or attempted delivery (if receipt is refused), as the case may be, and the date of receipt identified by the United States Postal Service on any return receipt card shall be conclusive evidence of receipt. Notices also may be sent by facsimile or email transmission, which shall be deemed received when transmitted if a document is electronically generated by the transmitting machine confirming that the transmission was received, and the recipient sends a responsive email confirming receipt. Any party, by written notice as above described, may alter the address for receipt by it of written notices hereunder.
- 8.2. **Waiver.** Failure to enforce any term or condition of this Agreement shall not be a waiver of the right to later enforce such term or condition or any other term or condition of this Agreement.
- 8.3. **Severability.** If any provision of this Agreement is found to be void or unenforceable, that provision will be enforced to the maximum extent possible, and the remaining provisions of this Agreement will remain in full force and effect.
- 8.4. **Assignment.** This Agreement may not be assigned or transferred by either party without the prior written consent of the other party, which permission shall not be unreasonably withheld. Customer agrees that Milliman may subcontract services to be performed in connection with this Agreement provided that any such subcontracting arrangement shall not relieve Milliman of any of its obligations hereunder.
- 8.5. **Excused Performance.** Neither party shall be liable for any delay or failure to perform due to causes or events beyond such party’s reasonable control.
- 8.6. **Entire Agreement/Amendments.** This Agreement, together with the Exhibits thereto, contains the entire agreement and understanding between Milliman and Customer with respect to the subject matter thereof and supersedes all prior agreements and negotiations, written and oral,

relating to the subject matter. This Agreement and such Exhibits shall not be deemed or construed to be modified, amended, or waived, in whole or in part, except as set forth herein or in writing executed by the parties hereto. No document, purchase order, or any handwritten or typewritten text which purports to alter or amend the printed text of this Agreement shall alter or amend any provision of this Agreement unless executed in writing by both parties. Execution and delivery of this Agreement by facsimile transmission shall be binding for all purposes.

- 8.7. **Governing Law/Dispute Resolution.** The Agreement shall be governed by, subject to, and interpreted in accordance with Indiana law, without regard to conflict of laws principles. In the event of any dispute arising out of or relating to this Agreement that is unable to be resolved through negotiation, the parties shall submit the dispute to final and binding arbitration under the Commercial Arbitration Rules of the American Arbitration Association. The arbitration shall take place before an arbitrator selected by mutual agreement of the parties, provided that in the event of a claim in excess of \$250,000, the arbitration shall take place before a panel of three arbitrators. In such a case, each party shall designate in writing a single neutral and independent arbitrator. The two arbitrators designated by the parties shall then select a third arbitrator. The arbitrator(s) shall have a background in either insurance, actuarial science or law. The arbitrator(s) shall have the authority to permit limited discovery, including depositions, prior to the arbitration hearing, and such discovery shall be conducted consistent with the Federal Rules of Civil Procedure. The arbitrator(s) shall have no power or authority to award punitive or exemplary Damages. The arbitrator(s) may, in their discretion, award the cost of the arbitration, including reasonable attorney fees, to the prevailing party. Any award made may be confirmed in any court having jurisdiction. Exhibit B – Description of Provided Products and Services

Service Description for Milliman PRM Analytics™ Care Coordinator Reports

I. **Scope.** This Service shall include the following deliverables:

Milliman PRM Analytics Care Coordinator Reports.

A. **Description.** The Care Coordinator Reports (CCRs) are an opportunity based analytic tool. They provide information at the population level, and facilitate drill down to the individual patient level. The Care Coordinator Reports include Opportunity Prospective Scores - estimates of a patient's healthcare expenses and utilization over the next six months, absent additional ambulatory management intervention. The Opportunity Prospective Scores are developed using Milliman proprietary predictive analytics and can be used in selecting patients for further care intervention and in managing patients.

B. Components of the Care Coordinator Reports

1. **Filter Population.** The Filter Population capability allows a user to select patients based upon pre-defined demographic characteristics, provider characteristics, clinical conditions, and Opportunity Prospective Scores. It also provides summary metrics regarding certain characteristics of the selected patient population.
2. **Population Report.** The Population Report presents select Opportunity Prospective Scores, historic utilization measures, clinical condition highlights, demographics, and provider information for each patient in the selected patient population. Users can decide which patients they want to review in greater detail using the functionality and information included in the Population Report.
3. **Patient Profiles.** A more detailed Patient Profile is available for each patient in the population. A Patient Profile presents a concise summary of the selected patient's prospective risk profile, chronic conditions, demographic and physician information, and historical inpatient, outpatient, and prescription drug claims.
4. **Excluded Report.** The Excluded Report provides a list of patients included within the Customer data but not included in the other portions of the Care Coordinator Reports. These patients may not have recent eligibility or sufficient historical data to be included.

C. **Access.** The Care Coordinator Reports are available to users authorized by Customer via a secure hosted web application.

D. **Frequency.** The Care Coordinator Reports are produced monthly during the term of this license after receipt of clean data from Customer.

E. **User Guide.** The Care Coordinator Reports are accompanied by a user guide explaining navigation and features of the reports and all information included in the reports.

PRM Analytics

- F. Training.** One hands-on user training session of approximately 3-4 hour duration is provided at the time of initial Customer set up at a location provided by Customer. Additional training is available upon request and will be handled as a change order in accordance with Exhibit A of the PRM Analytics License Agreement.

II. Production Launch. The Production Launch component shall consist of the following:

UAT will be provided for a period of one month following Milliman's receipt of Customer data and completion of such data configuration and set-up. Issues due to limitations or data quality issues with Customer data sources are out of scope for completing the UAT.

Service Description for Milliman PRM Analytics™ Cost Model Dashboard

I. **Scope.** This Service shall include the following deliverables:

Milliman PRM Analytics Cost Model Dashboard.

A. **Description.** The Cost Model Dashboard is an advanced business intelligence tool that provides organizations a way to visualize and drill into their claims and demographic data. The tool will quickly allow the user to identify trends in their data and support period over period analysis including rolling time periods.

B. Components of the Cost Model Dashboard

1. **Filter Cost Model:** The Filter Cost Model screen displays cost and utilization about the selected population. This section allows the user to filter the data in order to display information limited to certain cost model groups (Inpatient, Skilled Nursing Facility, Outpatient, Professional, Other, Additional) or cost model lines. Additionally, the Filter Cost Model screen allows the user to limit the data to only potentially avoidable cost or non-potentially avoidable costs
2. **Filter Population:** The Filter Population screen displays demographics about the selected population. This section allows the user to filter the population in order to display information at the segment level.
3. **Average Monthly Enrollment:** The Average Monthly Enrollment screen displays the average monthly enrollment for the population or sub-segment of the population. Only demographic filters and dimensions apply to the Average Monthly Enrollment screen.
4. **PMPM:** The PMPM screen displays the per member per month cost for the population or sub-segment of the population. Population and cost model filters and dimensions apply to the PMPM screen.
5. **Utilization / 1,000:** The Utilization per 1,000 members screen displays the cost model utilization per 1,000 member months by cost model group or line. Population, cost model, and utilization type filters and dimensions apply to the Utilization per 1,000 screen. The graph is only displayed when consistent utilization types are selected or when all utilization types can be displayed. A warning message will appear to notify the user when inconsistent utilization types are selected.
6. **Cost per Service:** The Cost per Service screen displays the cost per service by cost model group or line. Population and cost model filters and dimensions apply to the Cost per Service screen. Similar to the Utilization per 1,000 members the graph is only displayed when consistent utilization types are selected. A warning message will appear to notify the user when inconsistent utilization types are selected.

III. Milliman Support Responsibilities. Milliman provides the following support to all Customers:

- A. User Support.** Milliman provides user support by way of a fully trained Help Desk accessible through email at prm.support@milliman.com. The intent of the Help Desk is to resolve Milliman-trained end users' issues, not to entertain requests for Services enhancements, modifications, or clinical guidance.
- B. Problem Severity Description.** Table C.3 outlines problem severity descriptions. The diagnosis of severity as related to a reported issue is determined by qualified Milliman system engineers/analyst.

Table C.3 Problem Severity Descriptions

Severity	Description
Priority 1	All or most of the service functionality is lost. Milliman is not operational and there is no workaround. A Priority 1 problem can be reduced to a Priority 2 problem if an acceptable workaround is found. Priority 1 support takes effect immediately until the issue is resolved.

PRM Analytics

Priority 2	Some functionality of the services is lost but still provides useful information. Priority 2 issues are queued ahead of standard issues.
Standard	Service functionality is intact with issues revolving around items that limit the usefulness and/or user friendliness of the system.

1. Problem Reporting Process.

All issues received via the support email address will provide an auto-reply to acknowledge receipt of the issue. Within 1 business day Milliman Customer Support will provide a reply as to the problem Severity level and/or courses of action to be taken in relation to the issue. As part of the diagnosis/triage Milliman may request additional information and/or diagnostics to be performed by the client to effectively identify the issue.

2. Problem Resolution. When Milliman's Help Desk is informed of a problem, the following actions are taken:

- a. **Problem Reproduction.** Milliman's Customer Support Department will attempt to reproduce the problem. For this, a customer will need to provide a clear description of the circumstances under which the problem occurs. This may include Customer Support requesting the email address (account name) of the account in question. As part of problem reproduction Milliman may request more information and/or diagnostics to be performed by the client.
- b. **Defect Logging.** When the problem has been duplicated by Milliman's Customer Support Department; it may be logged as a defect in Milliman's defect database if the root cause of the original problem is due to a software defect
- c. **Defect Investigation.** Milliman's Product Development Team will investigate the cause of the problem.
- d. **Workaround.** When, in the course of the investigation, alternative ways are found to obtain the design goal while avoiding the interruptive symptoms of the defect; these workarounds will be communicated as a solution to the problem. If the defect is deemed critical, a slipstream release will be created to address the issue. If the defect is minor it will likely be addressed in a future release of the system.

PRODUCT INFORMATION

Care coordinator report

Opportunity based analytics tool to facilitate patient risk stratification and more efficient care management. Includes proprietary predictive analytics for care management.

Cost model dashboard report

Business intelligence tool that provides organizations a way to visualize and drill into their claims and demographic data for top-down analysis.

Physician risk and credibility adjusted report

Operational management tool used to report on various aspects of physician performance. The tool first adjusts physician experience for patient morbidity using industry standard risk scores, then adjusts measures to account for the unreliable nature of small patient panels and general patient cost variability.

Patient Flow

Patient Flow is a new product from MedInsight, created for payers and providers that explores and draws inferences from the connections between patients and healthcare providers as they deliver care. A connection is formed when a patient has services at two different providers within a short time period. Using sophisticated social network analytics, Patient Flow draws insights from these connections the same way social media companies work with networks of friends, followers, and posts. It creates interactive, geographic visualizations of patients as they visit with providers. These interactions comprise a history that can be nuanced by provider specialty to focus on plausibly causal connections.

Conditions to consider

Conditions to Consider is a new product from the Milliman MedInsight suite of machine learning analytics. It identifies and leverages similarities between patients within a population to ensure appropriate credit for patient morbidity in risk-based contracts, and it assists in medical case finding initiatives. Similarity is defined based on a patient's demographic information, medical conditions, and prescription histories. It uses collaborative filtering analytics, a common approach among online retailers that leverages elements such as purchase history to identify similar shoppers.
