Scope of Work

Create an analysis to aid Accountable Care Options in distributing their received shared savings to the various physicians who participate in the ACO.

Assumptions

This analysis will be based off the modeling in the Physician Risk and Credibility Adjustment (PRCA) Report. CCLF data will be relied upon for this analysis as well as the physician-to-member mapping provided by Accountable Care Options.

Deliverables

- An Excel workbook illustrating the shared savings by TIN under both a probabilistic approach and a point estimate approach
- An Excel workbook illustrating the TIN analysis but anonymized
- An Excel workbook illustrating the shared savings by NPI under both a probabilistic approach and a point estimate approach
- An Excel workbook illustrating the NPI analysis but anonymized

Cost

The price \$15,000 will be a fixed bid price for all services outlined in this change order to be invoiced upon deliverable.

In the instance where a scope change is required, Milliman will bill additional fees based on time and materials specific to the work required for the scope changes.

Timeline

Upon approval of this project order, Milliman will work with Accountable Care Options on timelines for completing work outlined in this project order.
