

Indianapolis Health and PRM Analytics  
Medicaid Data Engineering contract

This internal contract covers the division of labor, roles, responsibilities and revenue between the Indianapolis Health and PRM practices in regards to the servicing of state Medicaid clients.

## Billing

PRM will bill hourly for all work under the agreed upon Indianapolis Health Medicaid – PRM billing rate. The rate will be updated no less than annually and will be documented separately.

Indianapolis Health will supply billing codes for state-specific codebase work and monthly production for each state. PRM will work with Indianapolis Health to establish billing codes for work where expenses will be shared between multiple states.

The scope of work defined below is expected to result in a long-term estimate of roughly \$10,000 to \$15,000 of billable work per month per state Medicaid program data feed at the current agreed upon average billing rate. However, months spent implementing new state Medicaid data feeds will likely exceed this estimate.

## Scope

PRM will bill Indianapolis Health for the following work:

- Monthly data processing (production)
- Implementation of new state Medicaid data feeds
- Maintenance and requested changes to existing state Medicaid data feeds
- Development, enhancement, and maintenance of PRM owned infrastructure and code that is used as part of state Medicaid data processing
  - PRM will provide descriptions of this work along with which states will benefit and how when working to establish a billing code.

## Production

PRM will work with Indianapolis Health to define production handoff points and any automated quality control checks to be built for each state. PRM will be responsible for troubleshooting any errors that occur prior to the handoff point.

## Requirements and Prioritization

Indianapolis Health will designate an individual to gather and communicate requirements and prioritization across states. While PRM will strive to address any requests in a timely manner, there may be times when conflicting requests require prioritization.

Indianapolis Health will remain responsible for determining the appropriate priority order of requested enhancements.

---

I acknowledge the receipt of this contract and agree with the scope and terms.
