

## Memorandum of Understanding

This Memorandum of Understanding (MOU) dated as of this 19<sup>th</sup> day of July, 2021, is entered into between MedInsight PRM Analytics ("PRM") and New York Health ("NYH") and sets forth the mutual intentions of PRM and NYH relating to the design, development, and support for row level security (RLS) with Power BI in Milliman Access Portal (MAP).

### RECITALS

- A. PRM has the knowledge, experience, and capacity to perform the task of designing and developing a solution for RLS with Power BI,
- B. PRM has the knowledge, experience, and ability to separate Power BI data using a separate Power BI capacity; and
- C. NYH has explained the features and security necessary to fulfill their contractual agreement with their client.

The terms and conditions that shall apply are described herein.

### TERMS

1. NYH will be responsible for developing and providing the product using Power BI.
2. NYH will host their Power BI content on MAP under the terms of the existing MAP MOU.
3. PRM will develop the ability to use RLS with Power BI in MAP.
4. PRM will assist NYH as needed with the development of the Power BI product and data model.
5. PRM will work with GCS to use a separate Power BI capacity.
6. PRM will retain the rights to the code used in the MAP Power BI RLS development.
7. PRM will fix bugs in the interface as needed, feature enhancements and client requests will be scoped and scheduled upon request.

### Cost Structure

- PRM will charge a one-time fee of \$180,000 for development of RLS with Power BI in MAP
- Hourly billing (using standard billing rates for PRM employees) will be charged to NYH for any assistance PRM provides for NYH's product in Power BI
- Once in production on MAP, the cost of using MAP will be based on the base MAP user fees laid out in the existing MAP MOU. The premium fee per user per quarter for Power BI RLS will be waived for Anthem users indefinitely, but not for other NYH clients
- PRM will work with GCS to have the cost of a separate Power BI capacity through GCS flow directly to NYH.
- Should GCS be unable to stand up a separate Power BI capacity, PRM and NYH will negotiate an amendment to this MOU to cover the creation of a capacity by PRM.

IN WITNESS WHEREOF, the Parties have executed this MOU as the date first written above.
