QlikView HOSTING CONTRACT
AMMENDMENT FOR ACO INSIGHT

This is an amendment to the existing contract between the PRM and NY Health practices signed 5/29/15. This amendment applies to the ACO Insight report.

This amendment is necessary because there is anticipated to be many instances of ACO Insight being delivered to many different end-clients (each with likely different end-users). This delivery style is designed to support different frequencies of updates and differing feature sets by client, but it is not sustainable under the original pricing structure.

This amendment is only valid as long as ACO Insight does not utilize row-level security (i.e. end-user specific data segregation inside a single ACO Insight instance).

For this amendment, an instance of ACO Insight will be the unique combination of an ACO Insight template, the client-specific data loaded into it, and the group of end-users with access to it. Multiple users may access the same instance, but it is anticipated all end-users of an instance would be employed at the same organization and all users will have access to all of the data contained in that instance. When an instance of ACO Insight is refreshed, either the ACO Insight template or the client-specific data could be changed/updated. Once an instance is refreshed, the prior version will no longer be available to the end users.

Initial publication of each ACO Insight instance will be handled by PRM staff and billed per the original QlikView Hosting Contract. NY staff will be trained to be able to publish refreshes of existing ACO Insight instances. PRM will not charge for enabling and training NY staff to perform this task, nor for answering questions that arise while NY staff perform these refreshes.

PRM Analytics

Costs for ACO Insight will be invoiced quarterly and will include the following:

Quarterly Invoicing	PRM Standard Service Notes

▪ First 50 instances:
 	
    ▪ $75 per quarter per hosted instance
 	
▪ All additional instances (i.e. instances #51+):
 	
    ▪ $50 per quarter per hosted report
 	
▪ Up to 3 anonymized demo instances can be hosted for no costs (multiples allowed to likely demonstrate different functionality or line of business)
	Refreshing/upgrading an existing instance does not count as a new/different instance (see above).

$50 per quarter per user per instance, Capped at $200 per user for a given user across all instances	Example of capping: if Jane.Doe@acme.org had access to 7 instances her user fees would be $200 per quarter (instead of $50 * 7 = $350). These per-user fees are to cover the marginal QlikView license fees.

The first invoice would be for 1Q2018.

All costs above will increase by 3% at the beginning of each calendar year.

Hosting enhancement requests are welcome; PRM Analytics™ will provide cost estimates based on time and expense. Enhancements will require independent approval before work commences.
